

C-FLEX is our newest polyurethane transfer film equipped with a special hotmelt for fast application at low temperature.

C-Flex is suitable for transfers to T-shirts, sport & leisure wear, workwear, sportbags and promotional products.

Always make a test to check suitability prior to production

- 140 Celcius
- 5 seconds
- medium pressure (2-3 bar)
- warm/cold peel
- suitable for cotton/polyester and cot/pol blends

Due to the various influences which occur from production and transfer of plotter letterings, consistency of the carrier materials and also washing and cleaning conditions, product liability can only cover the unprocessed material.
